## AGREEMENT

regarding the new DTT frequency plan  
in the frequency band 470 – 694 MHz between  
**Administration of Bulgaria and Administration of Macedonia**

### Preamble

This document describes a bilateral coordination agreement between **Administration of Bulgaria** and **Administration of Macedonia**. Furthermore it expresses in particular the convergence of will between both parties, indicating an intended common course of action.

### Background

In the light of the Decision of the European Parliament and the Council (Decision (EU) 2017/899) regarding the use of the 470 – 790 MHz frequency band in the EU, Administration of Bulgaria and Administration of Macedonia have to conclude an agreement for the future use of DTT (Digital Terrestrial Television), in order to be able to use the frequency band 694 – 790 MHz for terrestrial systems capable of providing wireless broadband electronic communications services and for flexible national use in the Union.

The intention during the negotiations to prepare this agreement has been to establish as a common plan of allotments and corresponding assignments.

### Introduction

The Administration of Bulgaria and Administration of Macedonia successfully facilitated the bilateral frequency coordination activities in order to implement the relevant broadcasting spectrum reorganization, with a view to:

- Achieving mutual compatibility of the spectrum resources to be used in the UHF-band;
- Facilitating any consequential modifications to the GE06 Plan.

## **Working method**

Both Administrations have been gradually submitting their requirements bi-lateral or within SEDDIF group dealing with the re-planning of the frequency band 470 – 694 MHz. The submissions of the requirements have been followed by an analysis of the compatibility of the requirements by both Administrations. This analysis was the basis for the development of a common frequency plan containing the most feasible solution across coordination area of the Administration of Bulgaria and Administration of Macedonia. Hence, the development of a common frequency plan has been an iterative process as:

- The modifications to the proposals have been evaluated taking into account national requirements;
- Coordination areas of neighboring countries have also been taken into account.

## **Results of the activities**

The implementation of the agreed frequency plan will be done step by step in the transition period which will start when the Agreement is signed. Both Administrations will contribute in the timely framework, as specified in the European Parliament and Council decision on the UHF band, with their best effort to implement the new agreed frequency plan in a way that a smooth transition from the existing GE06 Plan to the new agreed GE06 Plan, with the least possible adverse effects for the audience, can be carried out.

Both Administrations agree to a new common Plan comprising allotments and assignments for the entire territories of Bulgaria and Macedonia.

The new DTT plans of Bulgaria and Macedonia are recorded on the CD, one for each Administration, in electronic format (Terrasys notices) in the files:

for Administration of Bulgaria:

- “BUL\_Plan\_2017\_GE06D\_allotments.txt” for the GE06 allotments;
- “BUL\_Plan\_2017\_New\_allotments.txt” for the new allotments;
- “BUL\_Plan\_2017\_GE06D\_assignments.txt” for the GE06 assignments;
- “BUL\_Plan\_2017\_New\_assignments.txt” for the new assignments.

for Administration of Macedonia:

- “MKD\_Allot\_GE06\_1a\_1b\_may,2017.txt” for GE06 allotments;
- “MKD\_Allot\_ext\_new\_2a\_2b-may, 2017.txt” for the new allotments;
- “MKD\_Assign\_GE 06\_final\_may,2017.txt” for the GE06 assignments;
- “MKD\_Assign\_ext\_new-june 2017.txt” for the new assignments

The list of the new allotments and the frequency assignments of Administration of Macedonia successfully coordinated by Administration of Bulgaria is presented in the **Annex 1**.

The list of the new allotments and the frequency assignments of Administration of Bulgaria successfully coordinated by Administration of Macedonia is presented in the **Annex 2**.

Both Administrations of Bulgaria and Macedonia agree that they will not object to the following modifications of the GE06 Plan in accordance with the Article 4 of GE06 Agreement:

- Addition of new allotments, as they have been agreed and are described in "BUL\_Plan\_2017\_New\_allotments.txt" and "MKD\_Allot\_ext\_new\_2a\_2b-may, 2017.txt";
- Addition of new assignments, which are accepted in this bilateral agreement;
- Modification of already recorded in the Plan GE06 assignments with technical parameters, according to this bilateral Agreement.

All the DTT assignments of signing Administrations above 694 MHz within the territories of Republic of Bulgaria and Republic of Macedonia shall not be used after the end of the transition period and, consequently, shall be deleted from the Plan GE06, unless in accordance with art. 1 of Decision (EU) 2017/899 administrations have to delay allowing the use of the 700 MHz frequency band on the basis of one or more of the duly justified reasons set out in the Annex to the Decision. Both Administrations agree that they will inform each other about the delaying.

All future further national developments and refinements of the broadcasting networks in the frequency band 470 - 694 MHz, which may be necessary because of the needs of the broadcast network operators to evolve their networks, will be done according Article 4 of the GE06 Agreement.

#### **Final remarks**

This agreement is without prejudice to the result of coordination agreements that the Administration of Bulgaria or the Administration of Macedonia sign with other neighboring countries, nor should it in any way hinder such coordination agreements.

### **Enter into force**

This agreement will enter into force upon the signature of two parties.

### **Language of the Agreement**

This Agreement is prepared in English in two originals. Each Administration holds one original.

## 2. List of GE06 assignments

All assignments in this table have been recorded in the Plan GE06. The antenna diagrams for No 381 (SLIVEN) and No. 382 (STARA ZAGORA) will be modified and the relevant notices will be sent to the ITU.
